For internal use of Federation of Chiropractic Licensing Boards only.

Please note that not being listed in the database does not guarantee that actions have not been taken by regulatory boards. Reports can be in process and not yet received by the FCLB. It is strongly urged that you contact the board(s) to verify: (1) if the doctor has a license in good standing; (2) has any pending or previous actions; (3) has any complaints filed against him/her.

It is the responsibility of the person initiating the search to query at a later date to see if new actions have been reported after the date of the search.

CIN-BAD's Official Actions Database is a "red-flag" service designed to bring attention to matters of potential concern or positive status. Any subsequent actions taken as a result of this report must be based on complete information obtained directly from the licensing authority(ies) which took the original board action(s), or other authorities as noted in this report. It is understood that the OAD is compiled from information provided by sources including international state and provincial licensing authorities, US Department of Health and Human Services (DHHS), and others. The FCLB is not responsible for any inaccurate or incomplete information provided to it by these sources.
